

Multifunctional Access Locks with CIP Safety

SECURE | FLEXIBLE | ROBUST DESIGN

01

Full integration
with a **SAFETY PLC**

02

Access control system
DIAGNOSTICS

03

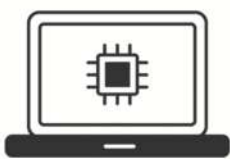

Network locks with local access
CONTROL & COMMANDS

Based on Rockwell Automation components, Multifunctional access locks with Common Industrial Protocol (CIP) Safety over Ethernet/IP provide the highest level of safety for the protection of personnel. The system can be installed on various surfaces and help prevent unintended interruption of the production process.

LEDs provide local status and diagnostics for easy troubleshooting. The device communicates information to the control system over the Ethernet/IP connection.
