

## Shredder area revamping at Alfa Acciai

At the end of January, AIC team completed the first modernization stage at the Alfa Acciai Group's Brescia site. This **first step** integrated a new PLC panel (Rockwell ControlLogix safety type -L81), converting and developing software for the shredder management, replacing the previous GE PLC placed in the pulpit room.

The **second step** will begin in Week 13 and will involve the screening area: the same Rockwell PLC will go to control the affected area in place of the GE and Siemens PLCs that are currently operating.

### About Companies:

**AIC Group** is a technological partner with extensive experience and deep know-how and stands itself as a global power control supplier and system integrator designing, manufacturing, and implementing automation systems, process control, and mechatronic solutions for both greenfield and revamping projects. Focusing on the steel and metals industries for long and flat products, the Group provides cutting-edge technical solutions by handling complex project schedules and thus establishing satisfactory and remarkable partnerships through its 10 international offices. More than 45 years of modernization for endless reliability processes.

**Alfa Acciai Group** has been one of the Italian and European leading manufacturers of reinforcing steel and wire rod for over 60 years. Established in Brescia in the 1950s, the Group comprises four subsidiaries specialising in various production fields of industry: Alfa Acciai, Acciaierie di Sicilia, Ferroberica and Tecnofil. With more than 1,100 employees and a total yearly production capacity of 2.5 tonnes of steel and rolled products, the Group set itself as a benchmark in terms of circular economy and sustainable production.
