

New Job Order for AIC North America at Gerdau Whitby ON - Canada.

AIC North America after revamping most of the drives on the rolling mill of Gerdau GLN Canada located at Whitby has been awarded with purchase order for the replacement of all the existing PLC at site. The order comes after another successful installation for the rolling mill stands drives and it is confirming the successful partnership between the companies specially on major revamping projects.

The supply included the design, manufacturing, testing, supervision of installation and commissioning of the electrical and automation part.

With this job all the existing PLCs for the rolling mill controls in the plant (ABB, Siemens, Modicon) will be eliminated due to obsolescence and replaced by new Allen Bradley PLCs. All engineering will be done by AIC.

Also included in the project is the supply of the new control desk for the rolling mill and the integration of all the HMI/SCADA with the new controllers.

(one of recent stands drives installed at site)

About Companies:

AIC Group is a technological partner with extensive experience and deep know-how and stands itself as a global power control supplier and system integrator designing, manufacturing, and implementing automation systems, process control, and mechatronic solutions for both greenfield and revamping projects. Focusing on the steel and metals industries for long and flat products, the Group provides cutting-edge technical solutions by handling complex project schedules and thus establishing satisfactory and remarkable partnerships through its 6 international offices.

More than 45 years of modernization for endless reliability processes.

GERDAU is a leading producer of long steel in the Americas and one of the largest suppliers of special steel in the world. Gerdau's North American business division focus on long steel (Gerdau GLN) and special steel products including beams and piling, merchant bar quality, rebar, special bar quality and wire rod products. The company serves the construction, automotive, agricultural, service center and energy markets through its vertically integrated network of steel mills, recycling, and downstream processing facilities.
